First Action on the Merits

Action Summary

Claims 1-16 are pending. Claims 1,4,8,10,11 are rejected. Claims 2,3,5-7,9,12-14 are objected to. Claims 15,16 are allowable. In light of search, the election requirement made by the examiner on 10/2/98 will not be maintained.

Declaration Defect - Improper Duty to Disclose Statement

It does not state that the person making the oath or declaration acknowledges the duty to disclose to the Office all information known to the person to be material to patentability as defined in 37 CFR 1.56.

The term "examination" must be replaced by the term "patentability".

Claim Rejection under 35 U.S.C. 102(a)

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1,4,8,11 are rejected under 35 U.S.C. 102(a) as being anticipated by Eastin (US 5,628,144). The reference teaches a method for priming (enhancing crop growth or photosynthesis) a seed and/or root (horticultural crop) which comprises applying to the surface of said seed or root hydrophilic particulate materials (clay, diatomaceous earth) wherein the

Art Unit: 1616

particles allow for the exchanges of gases by the crop. See abstract, column 2 lines 36-67, column 3 lines 26-52, column 12 lines 13-19.

Claim Rejection under 35 U.S.C. 103(a)

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1,4,8,10,11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Eastin (US 5,628,144). The reference teaches a method for priming (enhancing crop growth or photosynthesis) a seed and/or root (horticultural crop) which comprises applying to the surface of said seed or root particulate materials (clay, diatomaceous earth) wherein the particles allow for the exchanges of gases by the crop. The reference does not teach that said crop is an agricultural or ornamental crop. An ordinary artisan would have been motivated to apply the method to agricultural as well as ornamental crops with the expectation that said method would be effective in promoting or enhancing photosynthesis because agricultural and ornamental crops fall within the said horticultural genus. Species of the same genus would be expected to have similar properties and therefore, respond similarly to the same method.

Claim Objection / Allowable Subject Matter.

Claims 2,3,5-7,9,12-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base

Art Unit: 1616

claim and any intervening claims. The prior art does not teach the instant method comprising a particulate material having a block brightness of 90, hydrophobic core and hydrophilic surface, micron size of 3 and below or hydrophilic material being calcium carbonate and/or kaolin. Claims 15,16 are allowable, because the prior art does not teach a specific block brightness of 90 as in the instant method.

Telephonic Inquiries

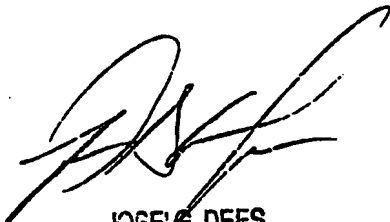

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alton Pryor whose telephone number is (703) 308-4691. The examiner can normally be reached on Monday through Friday from 8:00 a.m. to 4:30 p.m.
